Li Hung Chang will visit Washington in a few days in great shape.

Up to a late hour last night we had heard nothing further from Elizabeth-

TILLMAN has sent a message to ex-President Harrison challenging him to a joint debate.

An unsuccessful attempt was made to burn the court-house at Hartford, Ky., one night last week.

Ir is believed by those in a position to know that Bryan will carry this county by three hundred majority.

THERE is not enough gold and silver money known in the world to average five dollars for each person.

lar is a fifty cent dollar, just ask him if he has any to sell for fifty cents.

WE respectfully solicit the Hon. Charles Blanford to attend the speaking by Hon. Charles Bronston at Hardinsburg next Saturday.

Ms. Bryan has made a most triumph but the bolting papers don't seem to have found it out.

Hox. Charles Bronston will speak from the front of Murray's office in Cloverport at 7:30 o'clock p. m. next Saturday, the 5th inst.

Ir Bragg and Buckner should be nominated at Indianapolis, would it be proper to call the campaign cry of their followers the "rebel yell?"

THOSE are valiant followers that Dave Murray has over at Elizabethtown, but it seems that those other fellows have somebody pulling for them too.

THE silver rally at Hardinsburg next Saturday will attract the largest crowd that has assembled in Breckenridge county since the day of the centennial.

THE delegates to the boltocrat convention boast of what a fine looking set of men they are. They will be wishing for shirt-sleeved voters before November.

THE bolters meet at Indianapolis today to nominate a candidate for President, but the Courier-Journal is the only paper in the country that is saying much about it.

Ir that body of battle-scarred patriots now in camp up at St. Paul should hear any kind of a noise down about Indian- a silver dollar is worth a dollar anyapolis, that reminded them of thirty odd years ago, they will move immediately on the enemy's works.

Gold-suc papers are showing their utter contempt for the farmers by cartooning them in all kinds of ridiculous shaper-shabby and ragged clothes, big the per capita circu ation is only \$1.84 s coars- boots, seed-top bats, billy-goat waisk rs etc., besides calling them Jays, Rutens, Hayseeds, etc.

TALK of "international agreement" is well-known to be a campaign dodge, and it makes intelligent people feel sorry for the ignorant person who honestly talks it, and contempt for the knave who knows better, but proclaims it to deceive his feilow man.

THE fall of the Mexican dollar since the gold standard. Prior to 1873, the Mexicae dollar was worth more than the American gold dollar, and if we remonetize silver it will be more again.

THE Republicans can't dodge the money issue by trying to force the tariff to the front. The present gold standard you want to double the wealth of the system is a Republican measure, and owner of silver bullion by making fifty was put upon the statute books while that party was in power. They hope to defend it if they can, but they prefer some other question.

Ler those who are now reaping advantage from a vicious financial system remember that in the years to come their own children and their children's children may through the the operation of this same system, be made to pay tribute to the descendants of those who are wronged to-day."-From Bryan's speech of acceptance.

In all the ages silver has been the money of the plain common people and gold has been the money of the rich. But you say we have silver money now. Yes, that is true, but it does not pay one cent of the public debt, for the reason that there is now four hundred and fifty millions of it lying idle in the vaults of the public treasury.

THE adoption of silver at 16 to 1 will restore prosperity to all commercial enterprises in this country. The more money we have to do business with the greater will be the bulk of our business. It can't be so under a gold standard because there isn't sufficient money to meet the demands. When silver is made to perform the functions of money, paying our debts, public employes, etc., then more of it will circulate.

The World's Fair Tests showed no baking powder so pure or so great in leaveating power as the Royal.

WHEN Mr. Bryan comes through Cloresport, about the middle of the month the citizens of Breckenridge and Perry counties will see that he is given a reception worthy of his high position Politics will be laid aside for the time, and everybody will give him a cheerful greeting. The day and hour will be fully advertised in time for all to know

SENATOR Sherman, the Republican apostle of finance, said in a speech delivered in the Senate in 1809 that

"The contraction of the currency is a far me istreming operation than the Senators suppose Our own and other nati as have gone through hat operation before. It is not possible to take that voyage without the sorest distress. To every person except a capitalist out of debt, or a salarie flicer or annustans, it is a period of loss, du iger, lusaitude of trade, fall of wages, suspension of en erprise, bankruptcy and disaster. It means ruin all dealers whose debts are twice their busines capital, though one third less than their total properry. It means the fall of all agricultural production, without any great reduction of taxes. What prudent man would dare to build a house, a railroad, a factory or a barn with this certain

"Ir the relative few whose wealth consists largely in fixed investments have a right to use the ballot to enhance the value of their investments, have not the rest of the people the right to use the ballot to protect themselves from the disastrous consequences of a rising stand-Ir any one tells you that a silver dol- ard? The people who must purchase money with the products of soil stand in a position entirely different from the position of those who own money, or receive a fixed income. The well being of the nation-aye, of civilization itself, depends upon the prosperity of the masses. What shall it profit us to have a dollar which grows more valuable every day, if such a dollar lowers the standard of civant tour through the State of New York | ilization and brings distress to the people?-From Bryan's speech of accept-

> The consuming capacity of this country is in the soil. Our purchasing power comes out of the ground. No matter how high legislation may put the purchasing power of a dollar, if it impairs the purchasing power of the farmer, production and consumption fall. If government puts the purchasing power of gold up and the purchasing power of the farm down there can be but one result. The farm ceases, comparatively, to be a buyer in the markets. Business of all kinds feel the loss. Labor loses employment. Bankers doing a legitimate business lose investments. Property owners lose tenants and rents. Manufacturers lose sale for their products, and hunger and want, poverty and distress stalk ghastly through the land. As long as the prices of farm products go down, nothing in this country but gold can go

They Contradict Themselves.

Here are some of the brilliant arguments of the gold-bug fuglemen and the same intelligent leader of the people will quote them all in a ten minute conversation if you will give him the proper encouragement:

Silver was demonetized by Jefferson in 1806 and by Jackson in 1834; silver has never been demonetized. A silver dollar is worth only fifty cents

There is \$600,000,000 of gold in circulation in this country; the reason gold does not circulate is because it is too valuable.

The per capita circulation of the United States is about \$24; the reason why because silver agitation has driver gold

Silver is money; silver is a commodity The reason why the single gold standard is the best is because gold s the most valuable meta; the reason why silver was demonstrized in 1873 is because it was worth more than gold

If we restore silver to equal cofcage privileges with gold, gold will be driven out of the country and we will be flooded with cheap silver from foreign countries; in 1873 a dollar in silver was worth 1873 shows the fall in the products of \$1 03 in gold and we could not keep it American labor, including silver, under from going to foreign countries, hence we had to stop its free coinage.

> Silver is just as much a redemption money now as it ever was; silver is now redeemable in gold, and that is what makes it good.

You want to force a fifty-cent dollar on the people by remonetising silver; cents worth of silver worth a dollar.

If you remonetize silver you will drive gold entirely out of circulation, and there will be a ruinous contraction of the currency; if you remonetize silver you will cheapen gold and force it into circulation and there will be a dan-gerous inflation of the currency.

THE CLOVERPORT SCHOOL

Will Begin Monday, Sept. 7, and all White Children of Lawful Age May Attend Free.

The Cloverport Public School District No. 1, will begin September 7, 1896, and will continue for five months.

Every white child of lawful age will have the privilege of attending free of charge. The compulsory law requires every child of school age to attend some

school for eight consecutive weeks. It is our desire to continue this school for the usual term of nine months and fully sustain the course of study which includes Geometry, Book-keeping, Chemistry, Physical Geography, Physics, Latin, Zo-ology, English History, American and English Literature and Algebra. To this we expect to add Botany with

the analysis of twenty-five flowers. To accommodate young teachers and persons preparing to teach, we will organize, in February, a Teachers'Common School Course and in it will include much of the Teachers' ' Professional J. H. B. Legan.
